

Arthur Van Kwikenborne

Junior Cloud / Infrastructure Engineer

I am currently studying Cybersecurity with the goal of becoming a cloud engineer. I have hands-on experience with network analysis, scripting, automation as well as a solid foundation in DevOps.

Ethical Hacking

Cloud & DevOps Engineering

Education

Bachelor Cybersecurity & Infrastructure

Vives Kortrijk, Waregem

September 2023

June 2026

Projects

Spes Nostra

Heule

March 2026

Analyzed and optimized network infrastructure, configuring Lancom/Omada controllers and Cisco/TP-Link switches, with clear technical documentation.

Vives IT

Kortrijk

March 2026

The setup of a virtual remote environment accessible to students. This is intended to reduce the cost for students of purchasing a laptop.

Internship

Delaware

Kortrijk

June 2026

During my internship at Delaware I'm building a multi-agent system that automates Azure infrastructure provisioning and keeps architecture diagrams in sync with code changes. Multiple specialized AI agents work together, handling everything from security checks to infrastructure-as-code generation and CI/CD pipeline delivery. The result is a fully automated end-to-end workflow where a plain-language description is all it takes to spin up production-ready infrastructure.
